

ACJ320neo takes to the skies for the first time

Begins new era for Airbus corporate jets
@Acropolis_UK @Airbus #1stACJ320neo

19th November 2018 – The first ACJ320neo successfully completed a two hr and 40 minute first flight from Hamburg on 16th November, getting its short test-programme off to a good start.

Derived from the popular A320neo airliner family, some 500 of which are in airline service, the corporate jet version includes features such as extra fuel-tanks in the cargo-hold that will deliver even more intercontinental range, plus greater cabin-pressure for better passenger comfort.

It is these features that are being tested, before delivery of the aircraft to Acropolis Aviation in the coming months. The aircraft will then undergo cabin outfitting by AMAC in Basle, Switzerland, and be repainted in customer colours.

“The ACJ320neo first flight heralds a new Airbus corporate jet era, delivering a range improvement that enables nonstop travel between even more cities, in what is widely recognised as the best cabin of any business jet,” says ACJ President Benoit Defforge. “The ACJ320neo Family’s improved fuel-efficiency also means that it compares even more favourably in operating costs with traditional business-jets,” he adds.

Continuous improvements mean that the ACJ320 Family now comprises the ACJ319neo, flying eight passengers 6,750 nm/12,500 km or more than 15 hours, and the ACJ320neo, flying 25 passengers 6,000 nm/11,100 km or more than 13 hours.

Both aircraft feature fuel-saving new-generation engines and Sharklets, and deliver more comfort and space than traditional business jets with similar operating costs.

Airbus also offers a complete family of VIP widebodies that can carry even more passengers nonstop to the world - including the new ACJ330neo and ACJ350 XWB.

Today, the customers of more than 190 ACJs benefit from the robust reliability and worldwide support that comes from their airliner heritage, plus services tailored to corporate jet needs.

About the A320neo Family

The A320neo Family is the world's best-selling single aisle aircraft with over 6,100 orders from 90 customers since its launch in 2010. It incorporates latest technologies including new generation engines and Sharklet wing tip devices, which together deliver more than 15 percent in fuel savings from day one and 20 percent by 2020 with further cabin innovations. The A320neo also offers significant environmental performance with nearly 50 percent reduction in noise footprint compared to previous generation aircraft.

About Airbus Corporate Jets

Airbus Corporate Jets (ACJ) creates the world's most rewarding flying experiences for customers by providing them with unique expertise, the finest service, best technology and highest standards of care in corporate aviation. All Airbus corporate jets come from the most modern aircraft family on the market, derived from Airbus' successful market-leading jetliners.
